HOW TO
Tie a bow tie

IF YOU'RE IN A RUSH GO FOR PRE-TIED BUT WHEN IT'S A BIG EVENT YOU'RE DRESSING FOR ONLY THE BEST THING WILL DO: ENDO OF THE END OF THE NIGHT AND LET IT HANG FOR EXTRA RAT PASC STYLE POINTS

- 1 Do a knot as if you were going to tie your belt. The knot is the beginning. Hold back the bottom end and hold it in place ready to be fastened.
- 2 Bring the top end up and over the front of the 'bow' to become symmetrical. The shape you're looking for.
- 3 Take that end under and up, pushing it back through the loop going the desired 'doubling up' effect.
- 4 Pull evenly but not tightly. You'll damage the ends and there's no profit until the tie looks even symmetrical and neat. See, wasn't so hard now was it?

QUOTATION CHECK-LIST PENDANT LIGHTS & CHANDELIERS

For the chandeliers and suspensions ranges, the flexibility and the freedom to install our lights, brings to the designer a great part of creativity. We need for that, to collect information to set up the size of the suspension at the perfect dimension.

In the data sheets available on our website and also in the catalog, you will find suggestions of sizes depending on the ceiling height. Our team is helping the client to choose the right model or size depending on the height of the ceiling, the diameter requested, the headroom. Please collect information to help us define the appropriate lengths of cords and cables and calculate the corresponding budget. For projects orders, products are not sent without receipt of these information...! The setting-up of cord's lengths in our workshop is included in the price but the addition of lengths if any, is in supplement.

Check-list to be sent to the sales service : contact@designheure.com
